"This bill prohibits the sale and distribution of flavored tobacco products, including flavored cigars and electronic smoking devices." So this summary from your website basically means that this is a flavor ban for vapes, e-cigarettes, and cigarettos but its totally fine to keep selling regular plain flavored tobacco, which will be limited to cigarettes cuz what big tobacco company actually makes flavored cigarettes? If this is to make it 'unappealing' to kids its not gonna work, a good portion of middle aged smokers who vape didn't start out vaping they started out smoking cigarettes in their teens, today's youth wont be any different. Please do not pass this bill
