I believe this expansion of abortion "rights" to be not only unethical but downright evil. Regardless of religious beliefs we all should agree that it is murder to kill 9-month-old babies. How can we justify murdering babies up to the moment of birth? While I don't agree with early abortions for rape, incest, those with disabilities, I can see why someone may support abortion in those circumstances. This bill though is legitimate murder. Anyone voting in favor of this is no better than mass murderers. Pushing for these bills is backing many on the pro-life side into a corner to defend the lives of the innocent. Having been a pro-choice person and left-wing progressive for 6 years and then leaving those ideas behind, I get where many on both sides are coming from. Now I believe that nothing is more worth making sacrifices for than standing for the right to live. In 100 years abortion should be remembered as a dark period of society. I will work harder than ever before to defend life. Peaceful sacrifices have to be made when the lives of many are at stake. Over 63,459,000 lives have been lost so far, how many more do we have to tolerate? We must dismantle the pro-death industry. My suggestion is we as a society focus on prevention of unnecessary abortions with more access to birth control, subsidies and incentives for sterilization, and teaching the value of life. Please stop this bill and be on the right side of history.
