

Anson Biller
South China
LD 1006

Dear Senator Baldacci, Representative Meyer, and members of the Health and Human Services Committee.

My name is Anson Biller from South China where I farm berries and vegetables. I am writing in support of LD 1006 to increase rural access to testing for PFAS contamination. The long-term dangers of PFAS contamination of well water is increasingly well-known. As a state, we need to ensure that all residents have access to resources to test for these chemicals in their drinking supply. We know that the DEP's sludge map while capturing the majority is still an incomplete picture of PFAS contamination in our state.

Please, pass this bill to ensure that income level does not stand as a barrier to PFAS testing. I urge you to vote "Ought to Pass" on LD 1006.

Thank you,
Anson Biller
