

Testimony of Jackie Holmes, Albion, ME  
In SUPPORT of LD 1488, 'An Act to Expand Testing for Perfluoroalkyl & Polyfluoroalkyl Substances to  
Private Drinking Water Wells'  
Before the Health and Human Services Committee  
April 28th, 2023

Dear Senator Baldacci, Representative Meyer, and members of the Health and Human Services Committee. My name is Jackie Homes. I am the mother of a PFAS impacted farm owner. Please accept this testimony in support of LD 1006, which would protect low income Mainers from PFAS exposure and LD 1214, which would similarly help protect renters and home buyers.

For decades now, we have been utilizing the abundant resources of the earth to our benefit in the name of progress, financial gain and useful products. The list of our needs is endless. We have done this in many cases at the expense of the earth and her inhabitants, both human and animal and the earth herself. Everything has a price, an exchange if you will.

We have utilized and dumped at will, often it seems without regard for what the future will be for our children and our neighbors. PFAS contamination is one of those consequences. It is a contaminant that does not break down in our lifetime. And maybe never. This affects us ALL, no matter who we are or where we come from, our race, color, religion, sexual orientation, age and financial status. We are I think all 75% water, just like the entire earth. We all need clean water to sustain life in a healthy way.

LD 1488 proposed by Laurie Osher and LD 1006 proposed by Bill Pluecker go a long way to protect us and our water. These bills give us information about the safety of our drinking water and the chance to pursue remediation and ensure the health of ourselves & our neighbors and the health of all Mainers.

I urge you to vote "Ought to Pass" on LD 1006 and LD 1488.

Thank you for your time,

Jackie Holmes, Albion, ME
