LD 1619

Judiciary Committee,

Maine is a common sense state. LD 1619 is NOT common sense! Children in the womb have heart beat at 6 weeks, feel pain at 12 weeks and are viable at 22 weeks, as a baby born at 22 weeks in Maine went home recently. Abortion up to birth for any reason is cruel and wrong. A baby's head is partially delivered and then the brain stem or skull are cut with scissors and the dead child is delivered. If a woman finds an anomaly at 8 months, the child can be delivered and loved and held by his/her mother until they peacefully die---not torn apart alive in the womb!
Vote 1619 ought NOT TO PASS!
