LD 1619

I am writing today to express my concern for LD-1619. I am a devout Catholic and truly believe that allowing women to obtain abortions throughout any state of pregnancy, especially up until birth will cause more harm than good. I believe that every life should be protected, especially the lives of the unborn as they cannot speak up for themselves. There are cases of rape, abuse, and incest when the option to put the baby up for adoption is available. There are many women who cannot conceive children of their own and adoption is their only choice. As for the times when the life of the mother is at risk, medical intervention is justified. I believe that choosing to have an abortion for the sole reason of not wanting a baby is nothing short of ending a human life that does not deserve to be ended. Please consider the rights of all human life from the moment of conception and do not allow abortions at any or all stages of pregnancy. Thank you
