

Krystle Smith  
Westbrook  
LD 1619

To the members of the committee,

I am writing my testimony today because I am not in support of the proposed LD 1619. My daughter was born three weeks prematurely due to labor induction and pre-eclampsia that had become severe. She is now 12 years old and a child full of life, though she was a 4 lb baby when she was born.

I am writing to stop this bill to save lives, the lives of these unborn children. There is no reason why a bill should be passed that would allow a baby to be killed, when they could be a living and breathing child outside of the womb.

Please consider stopping this unnecessary bill from going through.
