LD 1619

Members of the Committee on Judiciary, this is testimony IN FAVOR OF LD 1619.

For reasons of demographic analysis and public health, a report on induced abortions must be written and saved by Vital Records. The proposed legislation would protect the identifiable personal information of the patient, which is a positive thing when the current political climate is considered. The bill would also clarify the decision-making process and any remaining legal issues.

Please pass this bill. Thank you.
