LD 1619

I am opposed to LD 1619 - it is simply barbaric & gruesome - medical technology can save the the life of mother and child at any point in late pregnancy - tearing and ripping apart the body of a baby is not necessary for the life of the mother.

The idea of tragic fetal disease or debilitation is usually applied if an unborn child has Downs Syndrome - this is VERY clear in places like Scandinavia and parts of Europe - few children are born with Downs Syndrome - sounds like the Nazi idea of "cleansing: the human race.

JUST SAY NO !
