Rockport
LD 1619

Honorable Speaker Talbot-Ross. We urge that you vote "NO" on LD 1619, "An Act to Improve Maine's Reproductive Privacy Laws." Terminating a pregnancy in the delivery room is murder, pure and simple. To do this you have to go out of your way and actively destroy a live baby in the birth canal by jamming a corkscrew into the skull and sucking out the brains. Philadelphia's friendly neighborhood abortionist, Dr. Kermit Gosnell, accomplished the same thing by cutting a newborn's spinal cord with a scissor. When authorities raided his little house of horrors, they found ten full term mutilated babies in his freezer. He's now serving life in prison without bail. This bill sets us up for more of the same. What kind of a society condones killing its babies? Preventing conception with a condom is one thing, preventing implantation of a fertilized egg with the after morning pill is another, and getting rid of a "tumor" or clump of cells in the womb before detecting a heartbeat can probably also be justified. But the pro-choice people keep moving the ghoul posts. When the baby waves back during his ultrasound, you've probably waited too long for his abortion. Terminating a pregnancy in the birth canal is infanticide. If you pass this legislation, you're telling the world the spirit of Joseph Mengele is alive and well and living in Maine. Please reconsider your sponsorship of this legislation. Please, Vote "NO" on LD 1619.

Respectfully,

David G. Reed, MD
