Bangor
LD 1619

Why do people pick and choose what science they believe? A baby is a living human being and people are trying to make it legal to kill babies, for what reason other than inconvenience!? I oppose any bill that will make it legal to kill babies at any stage. LIFE - Life begins at conception. There is something miraculous that scientists discovered in 2016 when at conception there is a flash of light that sparks when a sperm meets an egg. Scientists and Doctors KNOW that babies feel things while in the womb so again, why do people ignore or deny that fact? Apparently it's easier for people to let babies be killed when they're so little and helpless because they haven't made a connection or maybe their fear is what allows them to be ok with killing babies. Whatever the reason, it doesn't matter! Babies are living people and we cannot let them be murdered just because they can't speak for themselves. I strongly oppose this LD 1619 Bill and pray that my representatives do what is right and moral for once and block this bill from passing. Thank you for your time and God bless.
