Glenburn  
LD 1619

I do not support LD1619. You do not have to be pro-life to agree that abortion up to birth is a dangerous and violent violation of human rights. Any argument about medical necessity is untrue. A woman is always able to receive life-saving, necessary care from her doctor during pregnancy. No law prevents that. But we must, as humans who were allowed to be born, afford others the same opportunity. We must protect human life. We must speak for those who can't speak for themselves. Please hear the people in this state as we tell you, this bill cannot be passed.
