LD 1619

Vote NO on LD 1619! For years the pro-abortion advocates have stated that back alley abortions are dangerous. Now they want to advocate to remove penalties to anyone performing or assisting with any abortion regardless of who or where they are performed. This is a blatant disregard and contradiction to the safety of mothers to be. The argument that abortions are a "health care" procedure is no longer valid if anyone is allowed to do abortions at anytime, and anywhere without professional medical oversight. If LD 1619 is allowed to move forward, then insurances, and tax payer money should not be use to finance back alley abortions nor the medical treatment needed to follow up on any botch abortion. Pro abortion advocates cannot and should not have both ends of the argument and continue to be funded in the name of health care when it is obvious it is not about the health of the women, but the financial health of abortion clinics.
