LD 1619

DO NOT allow LD1619 to move forward. Abortion on demand without limitations is dangerous and unethical. It is worse than guns ownership without limitations. Regulations help keep people in line with respect and dignity for others. Physicians may advocate for the mother to be, and they will advocate for the person paying the physicians fee, which is most likely the pregnant mother or her insurance, but there is no advocate for the unborn baby. Unless the baby can have an advocate for equal justice and representation, this thought process of "guided by the women's physician" is flawed. The unborn baby has his/her own DNA and is a person which needs equal representation before being aborted. This is far from being healthcare. It is one sided legal care. Healthcare heals. Abortion care kills!
