

Kayla Burke
Machiasport
LD 1619

My name is Kayla Burke from Machiasport. I am currently 15 weeks pregnant with my third child. I have seen our precious child moving on an ultrasound screen and heard her heartbeat. At 15 weeks a baby in utero is already making facial movements as well as sucking and chewing movements. Hair is starting to form on their body and they have flexible hands and feet that are moving constantly. Their brain and internal organs are developing at a rapid rate. As soon as that child is conceived it is a life and a human. Passing a law that allows women to abort their babies at any stage is murder of a living precious little baby. This bill is unconstitutional and inhumane. We need to protect these babies while they are in utero just as much as we need to protect them when they are out.
