

Whitney Brum
Raymond
LD 1619

I Whitney Brum hereby am in opposition of this bill LD 1619. I am strongly against post-viability abortion allowing doctors to deem what's necessary beyond the health or mothers life at risk. I don't believe a mother has rights to take away the life of her child one month after birth. Why would it be okay to take away the life anytime before that. Any woman can find a doctor willing to deem an abortion necessary while there's doctors that would never deem the same exact patient/situation necessary. A decision to terminate should not be treated as lightly and normalized as it has. It is traumatic to terminate a human life and it is traumatic for the mothers for the rest of their lives. There are better ways. Life is a gift not trash.
