I understand that you are hearing testimony on a bill allowing late term abortions. As the uncle of a baby born prematurely, at 24 weeks, who is currently healthy and living at home with his parents, I feel like I must share my opinion on this matter.

Without blurring the lines of where the rights of the mother, father and unborn cross, I can not see where allowing abortion, especially past the time of (fetal viability), is anything other than murder.

I am not one who often writes to my local senator or representative but in this case feel that if I at least do not let my voice be heard then, I am guilty of every unborn child's death that would take place should this bill pass.

I strongly urge you to vote that this bill ought not pass. Surely there are other options available for these cases and maybe a bill to improve adoption options and process are in order.

Respectfully,
Dave Hentosh
