I appose this bill. I am 28 weeks pregnant with my little son I feel his little kicks all day and am reminded that he is his own person with a personality already forming all his organs can now function on their own! Life begins at conception all life is precious I believe that the mothers womb should be the safest place in this world, but it is now one of the most dangerous I ask you to please take a stand to protect and save these children. Jesus Christ died for all. Including each precious soul, that has not yet been born into this world.
