

David Fedrizzi
East Waterboro ME
LD 1619

Honorable Chair and Members of the Judiciary Committee,
My name is David Fedrizzi and I am from East Waterboro ME.
I am testifying today in opposition of LD1619 An act to improve Maine Reproductive Privacy laws.

Rather than improve Maine reproductive privacy laws as the name of the bill states, LD 1619 seeks to expand the killing of innocent human lives beyond the so called point of viability to the point of birth for any reason. With no definition of what constitutes necessity , no medical requirement, no ethics test, this bill is extreme and allows for the taking of human life to the point of birth for convenience.

Medical professionals are human and no amount of education gives them the right to be arbiters of life and death. Further more this bill removes any serious penalty for unlicensed individuals who perform abortions or licensed individuals who take the life of a baby after birth after an abortion attempt.

This bill appears to be more about the Government of the State of Maine supporting the abortion industry than it is about supporting the rights and lives of all Mainers.

The rights and lives of all Mainers that the Government is sworn to protect.

Please note no on LD1619. This is not what the majority of Mainers want.
