I am testifying because I think the whole truth needs to be heard before considering a bill that is so irresponsible, and such a crime even medical professionals who take an oath would not be performing these malicious acts.

There are laws in place to protect woman if they have a life threatening situation/condition during pregnancy that may require a termination of pregnancy. This bill to consider allowing abortion to full term is evil.

I believe even if we set aside the fact that people need to be responsible for their own actions, and consider that atrocities do happen that may put someone in a compromising position and they do not want a baby, murder is not the answer?

Tell me how the abortion works at full term? That is a living human being, at 9 months, that, in most cases, does not require any assistance for life or breathing! Do we need to go to extremes? I wish we didn't, there is no mild response to this bill, because it is extreme to even consider it. Murder is not the answer.
