If we can determine that life ends with a heart beat, how can we not determine that it begins with a heart beat. A mothers womb is suppose to be the safest place for a baby, why has it become a politically endorsed war zone for such precious life. My mom was asked to abort me. I am forever grateful she chose life. My life. My life matters, and so do all babies lives. Please do not let this pass. Protect the innocent, even when the world has gone mad. Take a stand for what is right. God sees all that we do, I pray we do what is right today.
