

LD1614

I am writing you today in support of LD1614. Historically again women have been lied to. They are not carrying a clump of cells. They should have the opportunity to have an ultrasound so they can see the baby that has been kicking them, there are organizations out there that will pay for this and also give them help. The Democrat party has always said that they would like to see abortion be rare and safe, it's time your actions support that. It has been proven that when a woman has an ultrasound she is less likely to have an abortion. I implore you to vote on LD1614.
