

To: The Judiciary Committee

I am writing to urge you to vote “ought to pass” on LD1614 for these reasons:

1. This bill will provide a woman with information that is critical to giving her a real choice in her health care.
2. Over half (27) states hold this requirement in their laws. It is a reasonable requirement.
3. Medical facilities should provide a woman with all her options:
  - a. Inform the patient of all risks related to the procedure.
  - b. Patient should be informed of other options besides abortion.
  - c. The patient should be able to view an ultrasound of the child in her womb before an abortion.
  - d. The patient should be given 48 hours to make an informed decision about such a serious procedure.

Please vote “ought to pass” on LD1614!
