

Nathan Persinger
Hampden
LD 1614

Honorable Members of the Judiciary Committee,
Please vote OUGHT TO PASS on LD 1614. This is a common sense bill that protects the lives of unborn children. An ultrasound is critical in providing an expectant mother with a clear picture of what an abortion costs - one human life. It is a critical piece of information that, if missing, a woman cannot truly give informed consent. Along with that, the receipt of alternatives, such as adoption and parenting resources are just as critical to give the expectant mother every opportunity to make a clear decision.
