

Ellen Kasprzyk  
Steep Falls  
LD 494

People who are poor or in some way disadvantaged are just as important as those of power and means. They do not have the same voice, but that in no way reduces their inherent dignity. That includes people with no voice and no resources such as the unborn. So please do not require me to treat them as if they do not matter. The people of Maine should not be required to pay for ending the lives of innocent, defenseless and voiceless people.

The Department of Health and Human Services should be concerned about Health and allocating limited resources to improving Health. Pregnancy is NOT a disease. In fact Infertility Is a disease or caused by a variety of diseases. Therefore abortion is not "healthcare". When the success rate is defined by a death, you have to be insane or evil to call it "healthcare". Please support LD 494.
