

Vicki Savage
Plymouth
LD 1614

I am writing to ask that all Senators and Representatives please vote yes on LD 1614 to Require an Ultrasound and Certain Counseling Before an Abortion. I believe every person should be able to see who they are carrying and be allowed to be counselled on options that they have before they actually make the decision to abort. The child, the person, whose life is at stake deserves that much from the mother who is carrying him/her before their life is terminated. Thank you for your time and please vote yes on this bill.
