

Gary Frank Strickland  
Brunswick  
LD 1614

Dear Judiciary Committee,

For most surgeries it would be unthinkable to perform them without an MRI or ultrasound prior. There are many reasons you should support this bill and one is for the safety of the mother but also to ensure that the mother understands exactly what she is doing with her baby. Pretending babies are "clumps" of cells is deceptive and this law will ensure that the mother knows exactly what she is doing. Please support this bill.

Sincerely,

G. Frank & Susan R. Strickland  
Brunswick, Maine
