LD 1340

I oppose LD 1340.

LD 1340 would ban legal “rapid-fire modification devices” that are already commonly owned and in use by Mainers. These devices include but are not limited to bump stocks and binary triggers that are used in a wide array of legal activities including competitive and recreational shooting. How does the State expect to enforce such a law? Will they be calling for gun confiscation? A gun buy-back program? Creating a gun registry? All solutions are either illegal or result in law-abiding citizens being disarmed while giving criminals the upper hand.
