

Kelly Coffin
Clinton
LD 995

Honorable members of the Health Coverage, Insurance and Financial Services committee,

My name is Kelly Coffin from Clinton. Please vote ought to pass on LD 995. Since making such an important and life altering decision as an abortion it is only common sense and right to allow a second opinion. Doctors are human and fallible. I have heard several personal stories of women told they needed an abortion for health and safety reasons who didn't take that advice and everything turned out fine. So the original medical advice proved wrong. A second opinion is reasonable. It is my opinion that it should also be covered by insurance.
