LD 1735

I do not support implementation of LD 1735. First of all, this is not providing healthcare to minors. We're 50+ years into assuring women have reproductive rights and yet there are those actively supporting the destruction of the same in minors. This is abhorrent and the child should be provided with psychiatric/psychological care for an illness of the same.

My additional opposition is the use of taxpayer funds to provide services especially to those from another state. Mainers are already burdened with high taxes and the State should be focused on the needs of its citizens.

Thank you.
