Augusta
LD 1619

I am strongly opposed to passing LD 1619 allowing for late term abortion. Our federal constitution provides for the right to life, liberty and the pursuit of happiness for every individual. An unborn child should be protected and defended under this principle. Parents do not have the right to kill a child the day after it is born, nor should they the day before it is born. Common sense, reason and respect for life need to prevail. There must be a different approach to solving the problem of an unwanted pregnancy other than butchering, chemically burning and wrenching a developing child from the natural incubator of its mother's womb. That is barbaric and inhumane. Please let Maine stand for life and the potential of every human being!
