

Debra Gragg
Hopkinton
LD 1735

It is imperative that you oppose this bill! As parents and grandparents, we are obligated to protect the children, they are all confused about who, and what they are throughout the course of their childhood. There is so much that's going on in the world that causes great confusion in their minds.. I beg you to not approve this; decisions like this need to be made when somebody is an adult and has a better understanding of what the long-term affects are to having surgery and hormone treatments. Be an adult, be a parent, be a grandparent, do the right thing and OPPOSE this Bill LD 1735!
