As a neighboring resident of the State of New Hampshire, I am submitting my opposition to this legislation to become an act of law.

This in my opinion would be no different if narcotics became illegal for a minor in our state to become legal for a minor in your state to partake in your state, and the parents have no recourse to say no, would be contributing to the delinquency of a minor. Minor children at a whim can pretend to be what ever they want as a child, but the reality of this they were born how God sought to have them live. While this can be debated, the mental acuity of a minor calls into question, if this is merely exploiting and trafficking children to your state, Human trafficking is a problem, and this act, is further allowing that to continue, and is being encouraged, which is wrong. Please ITL this act, and save our children from being exploited.
