Eliot
LD 1735

I am testifying in opposition to LD1735 “An Act to Safeguard Gender-affirming Healthcare”

- 1) It will usurp parental rights.
- 2) I have heard testimony of several adults who transitioned as adults and they regretted having gone through the procedure. One transgendered person said that she was dying of estrogen induced cancer. She also stated that this procedure did not cure her mental disorder.

The State of Maine has no right to take Children away from Parents to give children both physical and mental/emotional illnesses.
