

Kristina Parker
Sidney
LD 1735

Honorary Members of the Judiciary Committee,

My name is Kristina Parker, I live in Sidney, Maine and I am seventeen years old. I am a conservative Christian.

Where do we draw the line? Since the beginning of history, there has been male and female. There are very very simple ways that we are able to tell which is which. Why is it being questioned now? Furthermore, why are we trying to confuse children? The idea of male and female is amongst the most solid and logical ideas of humanity. If you pull the solid foundation of truth out from under an entire generation's feet, there will be no hope left for humanity. Passing a bill such as LD1735 will allow more and more absurdities to enter our country until everyone is confused and suicidal. Then where will we be?

Do not pass LD1735 because it is extreme, ridiculous, bizarre, and dangerous. Woe to anyone who supports or votes for this bill and let them not be re-elected because they are not doing their duty to the public.
