LD 1735

As a parent and a concerned citizen for the well-being of our young people, LD 1735 ought not to pass.

This proposed Bill is evil . Interventions to align a young person's appearance or physical body with their gender identity respects the gender identity of the patient, as experienced and defined by the patient is evil. My child, our children , lack the maturity to decide as a patient to decide about having sex change surgery or interventions. This is child mutilation advocacy and will lead to a great amount of problems and suicides in Maine. A child should not be allowed to be taken across state lines to have sex change surgery or as stated: "interventions to suppress the development of endogenous secondary sex characteristics". Those who would profit from this are the pharmaceutical and big medical entities .

LD1735 would make Maine a trans-sanctuary state and invite human trafficking and abuses to prosper. This is evident in a quote statement : "A law enforcement agency may not knowingly make or participate in the arrest or extradition pursuant to an out-of-state arrest warrant for violation of another state's law against providing, receiving or allowing a child to receive gender-affirming health care".

Another alarming quote: "It is the public policy of (Maine) that an out-of-state arrest warrant based on violating another state's law against providing, receiving or allowing a child to receive gender-affirming health care or gender-affirming mental health care is the lowest law enforcement priority."

LD 1735 would lead to physical health issues, physical mutilation and mental health troubles. Trans trafficking of minors would make Maine a place of confusion for our kids and would invite child abuse regardless of where we live. Parents and police would have no rights in this process.

LD 1735 ought not to pass.
