LD 1619

As a pro-life advocate, I firmly believe that abortion is morally wrong and should not be allowed. Every human life is precious and deserves protection, regardless of the circumstances surrounding its conception.

When a woman chooses to have an abortion, she is essentially taking the life of a developing human being. This act is not only unethical, but it goes against the basic principles of human rights and dignity. The right to life, is the most fundamental of all other rights which are based off of.

Furthermore, many arguments in support of abortion are based on faulty reasoning. For example, the argument that a woman has the right to do whatever she wants with her own body doesn't hold up when considering that the fetus is a separate and distinct entity with its own unique DNA. The fetus is not the woman's body, but rather a separate human life growing within her.

Additionally, proponents of abortion often argue that it is necessary for cases of rape, incest, or health complications. However, these cases make up a small minority of abortions, and are already covered under Maine law. In many instances, there are alternative solutions that don't involve taking the life of the unborn child.

In conclusion, I believe that LD1619 is morally reprehensible and should be struck down. We need to promote a culture that values and protects every human life, from conception to natural death. Most importantly, any representative that votes in favor of LD1619 will not only lose my vote, but I will actively oppose them in the next election.

Thank you for considering my opinion.
