

JACOB SHEARER

lakeville

LD 1914

I am a us marine, infantry machine gunner and two time combat veteran. 100%PT disabled veteran. myself and countless other veterans have traumatic brain injuries, PTSD, nerve damage , etc the psilocybin cubensis mushroom has healing properties that specifically helped with these traumas. I'm sure you have access to the information and science behind that. I am here to testify , saying we need legal access to this medicinal fungi. we need all bans lifted. as veteran and common citizens alike. we need the free use of natural medicines. please pass this bill for all your people of Maine to have the access to the medicine they deserve. it works its clean and its natural. thank you
