

Jennifer Smith
Presque Isle
LD 1914

My name is Jennifer Smith. My husband and I attended the Maine Fungi Fest this past weekend and became aware of the LD1914. We support the passing of this legislature.

I am a healthcare professional in cancer care and the legal use of Psilocybin would change

People's lives as to what is available to them to help with pain and anxiety. I am also now aware how significant this could be in the assistance of getting people off of Opioids, treating Veterans with PTSD, and others with mental health challenges. Mushrooms have been used for thousands of years. They are not addictive. This would be such a wonderful tool in helping so many people.
