To Senator Hickman, Representative Supika, and the esteemed members of the Committee on the Veterans and Legal Affairs: I am writing to express support for the safe access to psilocybin treatment services. I suffer with PTSD and other neurological disabilities. I have done a lot of research, and have discussed with my doctor, the beneficial factors of psilocybin by consuming mushrooms. It is a natural remedy; and when used responsibly and or under the care of a doctor, one could begin to heal. People were afraid of medical cannabis, despite the fact that it too has been used for centuries. Look at how far that has come in society. Mushrooms have also been medicinally used for centuries, and are still being used for medicinal practice in other countries. Thank you for your service.
