

Susan Eland
BROWNFIELD
LD 1450

have lived in Brownfield, Maine for 37 years and only three miles from the airport access to the trail. I hike, bike, walk and xc ski with dogs. When the Rail Trail was built from Fryeburg to the airport road, I biked it even before it was completely finished. Many people did. Finally. A safe place to do all those activities. I pass both entry points of the trail almost daily and the parking lots almost always have multiple vehicles. I see kids on tricycles, the elderly, an even a miniature horse pulling an elderly gentleman. So many people use the trail for exercise, socializing, and nature walks in a safe environment. And my hope is the the D.O.T. implement the recommendation. So many people will be able to use more of the trail.
