As a resident of North Yarmouth I strongly support the creation of a rail trail on the Berlin Subdivision Rail Corridor. As a cyclist, runner, and walker I would make use of the trail several times a week for exercise and dog walking as roads are increasingly unsafe for these activities. This is a huge opportunity to provide a safe and easy way for residents and visitors, including those with disabilities, to improve their mental and physical health on property that would otherwise not have a benefit to the public. I would also bike on the trail to other towns on occasion; a collective effort to do this would result in improved environmental and economic outcomes for the area. Thank you for keeping the well-being of Mainers in mind as you consider this proposal.
