I do not recommend removal of RR track on Mountain Division track that may be needed for defense purposes in the event of war or national crisis. I live on Rt 5 with track behind my home that is used by rail fans who removed fallen trees and other debris as workers for the state of Maine. there are plenty of walking and riding paths only a few miles away in Fryeburg ,Maine. It is a waste of state and federal funds which we don't have due to over spending by our government on useless projects like this one. Thanks for your consideration.
