I do not believe that it is the government's business to interfere in the matters of a family. The act of harboring a child without the consent or knowledge of a parent is KIDNAPPING. If this were to happen to your child how would you feel. Children are the responsibility of the parents. I believe that is even a law, until they are out of high school or otherwise emancipated. Children can not buy alcohol, buy cigarettes or vote so how do you condone allowing them to come to this state and ruin their lives. This is not what you were elected for!
