

Richard Bernier  
South Berwick  
LD 1578

I am wholeheartedly against the passage of this bill. This bill takes away every individual vote and gives it directly to the cities to decide the most important election in this country. The constitution established the electoral college to give the rural voters a say in the presidential election. To override this is unconstitutional and should not be implemented by legislature.

This decision has impact on a national level. Any revisions to the constitution should be on a national level.

This country is a constitutional republic, not a democracy!! That is why our founding fathers wrote our most sacred document and declared the United States of America as a Republic.
