It is my opinion that I will be disenfranchised, and my vote will never count, in any presidential election, without the electoral college process. It is also my opinion that every single voting aged citizen, in any rural area of this country will also be stripped of their vote ever being counted without the electoral college representing them. The reason for this process is to ensure that every single vote is counted and represented by a delegate assigned to cast a single vote representing thousands of voters, both rural and urbanites.

Third world countries elect their officials by "popular vote". We are a Constitutional Republic, not a banana republic. We cannot stand as a country, making a move like this. This is not Venezuela or China or Russia.

Please vote against this dangerous bill.

Respectfully submitted, 17:04 January 4th 2024
