I strongly request that you oppose HP 1023 and every other attempt to end or subvert the Electoral College.

This proposal would effectively destroy one of the important checks and balances preventing tyranny, including "tyranny of the majority," and this proposal goes against our nation's core character.

As noted in Federalist #10, our country is not a democracy, but rather a republic, and for good reason. Also, state governments play a big role in our constitutional structure. The NPV goes against both of these important principles.

If we are to end our status as a federal republic, we should do it through a constitutional amendment, not an unconstitutional interstate agreement. Accordingly, please oppose HP 1023.
