

CLAYTON DAN MCKAY  
Dixfield  
LD 1465

Chair Lawrence, Chair Zeigler and Honorable persons of the EUT Committee

LD 1465 enables the ratepayers to have a seat at the table. For too long the committee has heard only from lobbyists rallying for the renewable industrial complex while ratepayers underwrite their projects. Solar projects deliver no better product than any other type of generation. In fact, solar developments effectively only produce when the sun penetrates into the excitable portions of the panels. This is truly an emergency bill and needs an ought to pass from every person on this committee. You must start considering the fact your votes will no longer be made in a vacuum. Ratepayers have voices too. This bill is a good start to right the wrongs of tariff rates, but keep in mind, ratepayers and landowners of Maine are fed up with the renewable industrial complex trampling the state to service the beast south of us.
