As a citizen of the state of Maine I would like to know how you are going to define "abnormally dangerous weapon". This legislature does not do anything to prevent violence or crime. After reviewing this legislation it does not implement anything that is already against federal law and state laws. This is now putting FFL businesses at risk for legal action. Restrictions do not prevent criminal activity . Murder is still against the law but it happens everyday. Instead of enacting restrictions on law abiding citizens and business try enforcing the laws that are already on the books.
