Dear Judiciary Committee:

I am for Pro Life and against aborting a living human being inside the womb who is breathing through the umbilical cord, sucking their thumb, moving, and can feel pain (scientifically proven). I am begging you to please put yourself in that position and imagine being ripped from your safe place while feeling the pain of having your life taken from you.

Please speak up for these innocent growing babies and protect them inside the womb as well as outside.

If you believe in God, then obey His Commandment, "Thou shalt not kill". If you believe in the principles of American constitutional democracy, a living human being has the right to life. No matter how they try to define an unborn baby, we know it is a living human being growing in the womb.
